About This Game

This game does not teach you to manage time or use it for your own purposes. In this game your time works against you, you will not have time on time - do not go any further.

Eat souls to add yourself a little time and beware of traps that can take away from you the most precious ...

Here is a classic platformer with juicy graphics for your attention where you will have to go through traps and collect souls most of the time so you don't lose.

The protagonist is the soul's guide, but you could never say it by his cute look. Although he is a part of the other world, he still obeys the mortals' laws.

You stand at the entrance to the dungeon. This dark, unknown place has terrorized and haunted the people of your land for far too long. Very few have dared enter, and thus far nobody has returned from venturing into it.

Its mystery led to rumors, people who say they peered into the entrance and saw a shifting darkness before them, eating at their very soul, warning of the dungeon's contents.

But they also occasionally mention seeing glistening lights. Floods of hope washing before them as if a benevolent phantom bestowed their spirit with courage.

You want to become a legend. You're enticed to enter this dungeon not only for the glory and the purging of this great evil, but also for the riches and the gold and the power associated with bringing an end to this dark time.

Armed with some equipment the local settlers could provide and before you step downwards on your journey, you check to make sure everything is to your desire.

On second thought

no. The glorious fps is too much for me. The eternal flame of the crashed helicopter was too much for my teammates. We couldn't proceed to fight against team delta. Our team recon was harrassed as our flame deity helicopter brought our fps to new heights. We still won because to heck with this game.

This game is bad. It could have been good but it isn't. There's even a ex-dev or something that's in the review section The game is playable, abeit very mediocre and nothing is special about it other than a slightly interesting double jump. The main thing that killed it for me is that there is a bug with the score menu or whatever the hell it is (esc button). It is a very big and annoying bug. It's like, you can only move and shoot when it's open, but when it's open you can't see. Also applies to chatting, but you don't actually know if you're chatting or not, as the chat is usually filled with wwwwwwwwwwwwwwwwwwwwwwwwwwwwwwwww with people trying to move.. Game worked fine for me. I wasn't able to get the Steam overlay to work or take screenshots from within the game using Steam, but the game does work and I was able to finish it.

This is one of Her Interactive's hidden object type of Nancy Drew games that they called "fast fun for busy detectives." It has a little bit of a different styled art. But the music, voice acting, sound effects, etc are all still by the same people like the adventure series you may have already come to know and love. I believe this was their way of jumping onto the hidden object train back in 2008. But trying to make it more fun and Nancy Drew-like! It may not be for everyone (nor are hidden object games) but I actually liked it back then and still do. Even though I've played the game before; I was able to finish it within two sittings. I'd say if you're a fan of Her Interactive's adventure series of Nancy Drew games and like hidden object games in general. Then give this a try. It really isn't that bad. It's meant to be one of those games you can finish in an afternoon. Plus, the story is pretty cool.. It Crashes alot.

. I would recommend if it was on sale since it won't take very long for you to finish the game. If you like tribal games and are into the zodiac, then this is the game for you.. thumbs up if you love gaming. Not part of the Season Pass. We're talking about a 20 bucks Season Pass.

Two maps (one predator, one combat) that are already in the game.

At 75% sale it might worth a shot, otherwise not really.. Both are adorable dorks. I like the anime guy more, and he has himself in a fine mess between his duty and heart. Ok volume.. Now I've never played the Board Game so hiccups in mechanics that mimic the board game go right by me. That said, there is nothing wrong with this game. It looks great and plays great. No cards? Seemingly a game breaker for some (why I haven't the foggiest) but they're coming and it's easy enough to enjoy the game while we wait. I can't find anything wrong with this game and support is always standing by, ready to assist. As a new player the gameplay itself seemed daunting at first but after the tutorials and playing briefly it all comes together. In fact, in retrospect I'm a little embarrassed that I thought it too complicated to be fun! And that it is, fun!

I cannot recommend this game at ALL - after 45 minutes I had to stop playing, from the frequent crashes at load screens, completely 'out of left field' jumpscare and the story - I can't tell you what the story actually is - from one load screen to another (which are LONG, mind you) it seems like a different game of sorts, very disjointed.

The subtitles in English are choppy and broken - distracting. And Slenderman (YES this is SLENDERMAN, don't let anyone tell you otherwise) can pretty much snag you at any moment without warning or a sliver of a chance to look away or run. When I finally got 7/8 notes and turned around, took 2 steps and he popped without any warning in my face and cause immediate death I was done - I tried about a dozen times to get those notes.

It's one thing for a game to be difficult, or set an eerie tone so you feel compelled to sneak around and carefully search for the notes. It's another to not see him or any hint of him and then when you are almost done he pops in front of you and says NOPE.

Yes it's \$2.54 but this is Gamejolt or Itch.io fodder, and that is even giving it a compliment. I do hate to crap on a game, but this definitely does not deserve to be on Steam.

If you want to see my craptastic time playing it here you go! <https://youtu.be/V7jpfRz-rnxE>

[. kinda like sim earth wich is a good game. If you're looking for a SHMUP fix, do not, I repeat, do not buy this game.](#)

[Sluggish controls. Your ship has been smoking too much pot, apparently.](#)

[Bad sound design. Seriously, most enemies explode with a sound of a Very Angry Balloon Popping.](#)

[Bad level design. Everything looks very same-y.](#)

[Bad weapons design. You're stuck with the same guns for the duration of the game.](#)

[And don't get me started about the excuse of a storyline, not to mention dialogues \(and fonts! and text formatting!\).](#)

[Bottom line? Even at a bargain price - don't buy it.. A convoluted spread sheet. This is not really a game at all. I have literally no idea how anyone can play this and stay awake. I have 13 hours but only because I fell asleep "playing" it after 6.. Even the first two levels were so much fun! And there are even more as well as Mini-Games. Definitely a must have for everyone with a HTC Vive. This truly is the Dark Souls of mini golf.. needs a hentai pack](#)
