The goal of SimAg is to make simulations easy and practical This chapter is about a free and open source game called SimAg (see [www.simag.net](http://www.simag.net) for more information). It is targeted at farmers and people interested in farming. It is a game that helps them discover what is going on on their farm, and thereby learn how their farm works and why. It is a game that simulates the farming process. It is a game that helps them make decisions. It can also show them how decisions affect the results. The SimAg game can help you learn about and discover the principles of the four farm production functions, e.g., it can help you learn about the production functions of agriculture, you can make these calculations on your farm and test your results. The chapter discusses this game and explains how to use it and how to get started. There is a lot of information about SimAg in this chapter. I have covered the contents of the game in a way that should appeal to people who like to learn and people who already know

---

something about the farm. However, if you have never played the game or you have played the game for a while, this chapter should help you learn new things. If you are already familiar with farming and with the concepts explained in this chapter, you can skip to the next chapter and read the next sections there. The next chapter will explain more about the tools used in the SimAg game. This chapter explains how to use SimAg and how to get started. # Installing SimAg The SimAg game runs on Windows and can be downloaded from the official website. There is a special version for Macs, too, but this is not supported by the game. The SimAg game can be downloaded from the following URL: The following screenshot shows a few screens of the Mac version of the SimAg game. 82157476af
